

The Green Machine

Rarely a day goes by without some mention of “The Environment” in the media. From melting ice caps to waste management and landfill, environmental issues affect us all.

Could your project improve the environment with £1000?

Community Foundation for Merseyside thinks you could do something - no matter how big - that makes a difference. If everyone makes even a little difference, great things can be achieved.

To help Merseyside’s voluntary and community sector make their own difference the Community Foundation for Merseyside has grants of up to £1000 for projects that benefit the environment!

So, whether its running an environmentally conscious youth club, sprucing up local wasteland or educating people about the environment we’d like to hear about your project - you could be eligible for extra funding from the Green Machine.

For more information on the Green Machine Fund, or to apply, please contact Community Foundation for Merseyside grants team on 0151 966 3551 or download fund criteria and application packs by visiting:
